

Budapest, 8 May 2013

**ÉMI Non-profit Ltd. for quality control and innovation in building**  
H-1113 Budapest, Diószegi út 37.

**LETTER OF ENDORSEMENT**

Provided for the **BUILD UP Skills Hungary - BUSH** project, which  
is funded by the European Union within the framework of the Intelligent Energy-Europe  
program under BUILD UP Skills Initiative call.

This letter is to express the interest of our organization, ÉMI Non-profit Ltd. to support the  
proposed measures related to the building industry and training in the Roadmap developed  
by the BUSH consortium.

The Roadmap provides suitable framework for the continuing or further education and  
training of on-site / 'blue collar' workers in the field of buildings using energy efficient  
solutions and renewable energy sources. It also takes into account the expected contribution  
of the building sector to the national targets for 2020 regarding energy efficiency and  
renewable energies. Based on a complete analysis of the national situation in the Status  
Quo Report done by the project consortium the Roadmap covers all relevant target groups  
and supports the development of the vocational and further education and training for the  
building workforce.

ÉMI Non-profit Ltd. agrees with the importance of the proposed measures of the Roadmap  
and will contribute to the best of our ability to support their implementation in the following  
activities:

content of activities (objective, target group)	possible method of implementation (time and resource need)	expected results
Examining the improvement opportunities for coordination and cooperation in the building sector and related fields	organize consultations with responsible ministries	improved communication and cooperation between stakeholders
Promoting communication and cooperation between responsible ministries and professional organizations	organize consultations	improved communication and cooperation between stakeholders
Participating in the harmonization and implementation of	involvement and participation in the expert work based on	consistent, quality- oriented system; recognition of skilled

MAGYAR INGATLAN TANÁCS

Budapest, 3. May 2013

## LETTER OF ENDORSEMENT

### The BUSH

#### BUILD UP Skills Hungary project

is funded by the European Union within the framework of the Intelligent Energy-Europe program under BUILD UP Skills Initiative call.

This letter is to express the interest of our organization MAGYAR INGATLAN TANÁCS to support the proposed measures in the Roadmap developed by the BUSH consortium.

The Roadmap provides suitable framework for the continuing or further education and training of on-site / 'blue collar' workers in the field of buildings using energy efficient solutions and renewable energy sources. It also takes into account the expected contribution of the building sector to the national targets for 2020 regarding energy efficiency and renewable energies. Based on a complete analysis of the national situation in the Status Quo Report done by the project consortium the Roadmap covers all relevant target groups.

The MAGYAR INGATLAN TANÁCS agrees with the importance of the proposed measures of the Roadmap and will contribute to the best of our ability to support their implementation in the following activities:

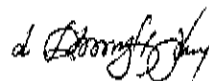

content of activities (objective, target group)	possible method of implementation (time and resource need)	expected results
2.3.2 Observation whether it is necessary to introduce magisterial eco-real estate developing trainings among districts. Target group: almost 200 domestic districts, at least 2 persons per districts.	In 2014 common MIT-VOSZ-BKIK Eco-real estate developing trainings. 120 thousand Ft per person. In partnership with Justice Service of Ministry of Public administration and Justice.	Until 2020 the energy utilities of 1 million apartments are to be decreased by the government target, 50% according to the eco-real estate development among districts.
2.2.1 Inform the self-employed people about the advantages and possible support of eco-real estate developing trainings among districts	Warnings for common eco-real estate developing trainings among the websites of MIT-VOSZ-BKIK and in the county press.	At least 2 persons per districts. In 2014 magisterial eco-real estate developing trainings for MIT-VOSZ-BKIK. (see 2.3.2)
1.2.2.4 Observation of the Green Building Information Modelling (G-BIM) that is used to promote the energy efficiency and the renewable energy resources for the eco-real estate developing constructions among districts.	To get around 20 thousand Ft per square metre constructing Energy Service Company (ESCO) loan from the European Energy Programme for Recovery (EEPR) until 2020 for 1 million apartments (around 80 million square metre). It is to be used for the restoration of buildings according to the guideline of 2010/31/EU green energy for buildings.	Until 2020 the energy utilities of 1 million apartments are to be decreased by 50% 50% energy overhead cost reduction of housing units According to the guideline of 2010/31/EU, the optimal cost, thus around 20 thousand Ft per square metre has to be the eco-real estate development among districts.

**Békéscsabai Centrál Vocational School and Student Dormitory****LETTER OF ENDORSEMENT****The BUSH***BUILD UP Skills Hungary project*

is funded by the European Union within the framework of the Intelligent Energy-Europe program under BUILD UP Skills Initiative call.

This letter is to express the interest of our organization Békéscsabai Centrál Vocational School and Student Dormitory to support the proposed measures in the Roadmap developed by the BUSH consortium.

The Roadmap provides suitable framework for the continuing or further education and training of on-site / 'blue collar' workers in the field of buildings using energy efficient solutions and renewable energy sources. It also takes into account the expected contribution of the building sector to the national targets for 2020 regarding energy efficiency and renewable energies. Based on a complete analysis of the national situation in the Status Quo Report done by the project consortium the Roadmap covers all relevant target groups.

The Békéscsabai Centrál Vocational School and Student Dormitory agrees with the importance of the proposed measures of the Roadmap and will contribute to the best of our ability to support their implementation in the following activities:

content of activities (objective, target group)	possible method of implementation (time and resource need)	expected results
Cooperation in takeover training programs proposed by the BUSH project	2nd half-year, 2014	Adequate approach and up-to-date curriculum in adult training
Promoting the further training of trainers	1st half-year, 2014 – 1st half-year, 2016	Trainers with modern, practical knowledge
Developing courses in certain professions and fields	1st half-year, 2014 – 1st half-year, 2015	Formation of suitable courses built on the previous trainings

**LETTER OF ENDORSEMENT**

**The BUSH  
BUILD UP Skills Hungary project**

is funded by the European Union within the framework of the Intelligent Energy-Europe program under BUILD UP Skills Initiative call.

This letter is to express the interest of our organization Solar Association of Hungarian Building Engineers to support the proposed measures in the Roadmap developed by the BUSH consortium.

The Roadmap provides suitable framework for the continuing or further education and training of on-site / 'blue collar' workers in the field of buildings using energy efficient solutions and renewable energy sources. It also takes into account the expected contribution of the building sector to the national targets for 2020 regarding energy efficiency and renewable energies. Based on a complete analysis of the national situation in the Status Quo Report done by the project consortium the Roadmap covers all relevant target groups.

The Solar Association of Hungarian Building Engineers agrees with the importance of the proposed measures of the Roadmap and will contribute to the best of our ability to support their implementation in the following activities:

content of activities (objective, target group)	possible method of implementation (time and resource need)	expected results
Cooperation of trade associations	Taking part in consultations 1st half of 2014	Recommendations concerning the use of solar thermal energy
Cooperation in changing attitudes concerning use of solar thermal energy	Taking part in actions for information and motivation 2nd half of 2013 – 1st half of 2015.	Information and opinion shaping about solar thermal energy using systems.
Partnership in the field of adult training	Consulting with institutions and trade associations on courses concerning solar thermal energy in buildings 2nd half of 2013	Negotiating on the courses suitable for market needs in the field of solar energy using systems.
Cooperation in revising the need of implementing courses for registration in the field of solar thermal energy.	Consultation 1st half of 2014	Consideration of trade and professional respects regarding courses for registration.

## EGYETÉRTÉSI NYILATKOZAT

### A BUSH

*BUILD UP Skills Hungary projekt,*

az Európai Unió Intelligens Energia- Európa program által támogatott „BUILD UP Skills Initiative” elnevezésű kezdeményezés pályázati felhívás keretein belül valósul meg.

Ebben a levélben Bankorg Kft. kifejezi egyetértését az BUSH projekt konzorciuma által kidolgozott Útitervben javasolt intézkedésekkel.

Az Útiterv megfelelő keretet nyújt az épületek energia hatékonyságával és megújuló energiaforrásokat hasznosító építészeti, épületgépészeti megoldásokkal kapcsolatos képzési programok kialakítására és fejlesztésére az építőiparban dolgozó kvalifikált szakemberekre vonatkozóan. Figyelembe veszi az épületek energiahatékonyságára és megújuló energia hasznosítására vonatkozó 2020-as nemzeti célokat. Az Útiterv a projekt keretében elkészült helyzetfeltáró tanulmány eredményeit tükrözve kiterjed a projekt célcsoportjainak széles körére.

Bankorg Kft. egyet ért az Útitervben javasolt intézkedések fontosságával és lehetőségeihez mérten elősegíti azok megvalósulását az alábbi tevékenységekben és módon:

tevékenység tartalma (célja, célcsoportja)	megvalósítás lehetséges módja (idő és erőforrás szükséglet)	várható eredmények
5. Akcióterv : pályázati lehetőségek kidolgozása a megújuló energetikai pályázatok megtérülési és társadalmi hatékonysági követelményei alapján	együttműködés keretében a MIT ingatlanszakértői és tervezőivel a MIT tudásközpont eredményei hasznosításával időszükséglet 70 – 100 szakértői óra szükséglet	a megújuló energetikai beruházások gazdaságosságának és 5-10 évnél nem magasabb futamidő alatti megtérülése, a lakossági és társasházi energetikai beruházások megtakarításból történő 7 éven belüli megtérülése
5. Akcióterv : a közhasznú energia-hatékony és környezettudatos bérlakás rendszer pályázati feltételeinek a kidolgozása, különös tekintettel a meglévő bérlakások korszerűsítése és az üresen álló lakások bérlakássá való átalakítására	MIT-ben már elkészített és a kormánynak is benyújtott szakértői anyagok hasznosításával időszükséglet 100-150 szakértő óra	az építőipar megrendelésekkel való ellátása (passzív munkahelyek aktívra tétele) az általános foglalkoztatási feltételek javítása a munkahelyek környezetében épített bérlakásokkal, a beragadt devizahitelek problémájának megszüntetése a „kilakoltatás helyett bérlakás” koncepció alapján

<p>5. Akció terv Energia-hatékony környezettudatos „zöld építőipari” beruházások korszerű „zöld közösségi bank” jellegű finanszírozási rendszerének a kidolgozása, pályázati forrásokkal kombinált inflációs ráta alatti bankhitelezéssel</p>	<p>BKIK ISZO és Bank, Biztosító osztályok irányításával (XXIII. osztály és a IX. osztály az Első Magyar Bérlet-építési Klaszter és Zöld Építőipari ÖKO Klaszter bevonásával időszükséglet : 150-200 szakértő óra</p>	<p>energia-hatékony és környezettudatos építőipari új beruházások, illetve felújítások hozzájárulnak az ipar élénkítéséhez, illetve a megújuló energetikai eszközök és berendezések hazai gyártásának a megszervezésével mintegy 50-70 ezer új munkahely hozható létre</p>
<p>5. Akcióterv : szakmai szervezetek szerepének növelése: A MIT eddig is részt vett az NGM és ÉMI által indított energiatakarékossági pályázatok zsűrijében</p>	<p>a szakmai szervezetek részvétele ajánlatos, mivel közvetítik a tervezői és felhasználói problémákat, másrészt azok megoldásában is hatékonyan közreműködnek időszükséglet : igények szerint témaként 30-50 szakértői óra</p>	<p>a szakmai szervezetek részvételével javul a pályázatok hatékonysága és a pályázati források megtérülési időszükséglete, másrészt a szakmai szervezetek népszerűsíteni tudják ezeket a programokat</p>
<p>5. Akcióterv Országos pályázati tanácsadó hálózat kialakítása a KKIK ISZO (XXIII. osztály) vállalja a megújuló energetikai fejlesztések-beruházások előkészítéséhez (környezetvédelmi és energiaaudit) készítésével országos tanácsadói hálózat létrehozását a BKIK és a VOSZ megyei szervezetei bevonásával</p>	<p>jelenleg hiányfunkciót jelent a tanácsadó szervezetek hiánya, amelyeknek kiemelt szerepe van a megfelelő műszaki megoldás kiválasztásában és a pályázati feltételeknek is megfelelő fejlesztési programok kidolgozásában</p>	<p>a felesleges ráfordítások kiszűrhetők, gazdaságossági és társadalmi hatékonysági szempontok így jobban érvényesíthetők, a szakmai tudás hiányát pótolja, pl. az önkormányzatoknál és a közintézményeknél az energetikus munkakörök hiányát</p>
<p>5. Akcióterv : szemléletformálás a hazai ingatlanok energiaszükséglete több, mint 20 %-kal is meghaladja a EU átlagot, illetve a szomszédos Ausztria szükségletét</p>	<p>a problémát nem csak a megújuló energetikai beruházások korlátozottsága jelenti, hanem a rendkívül hibás szemlélet is, amely nagymértékben hozzájárul a környezetterhelés növeléséhez pl. gáz kiváltása fosszilis (szén, fa) fűtéssel költségcsökkentés érdekében, faállomány pelletté feldolgozása, stb.) energia-hatékony ingatlanok szabálytalan üzemeltetése</p>	<p>a fosszilis energiahordozók megújuló energiával való kiváltása csökkenti a környezetterhelést (levegőtisztaság), a „zöld bérlet” kísérleti rendszer bevezetésével közös érdekelttség jön létre a finanszírozó, beruházó és üzemeltető, illetve a felhasználók között (szabálytalan működtetés során anyagi felelősség a többletenergia fogyasztás költségére vonatkozóan)</p>

5.2. Képzési célkitűzések iskolakörön kívüli felnőtt oktatás OKJ és OKJ-n kívüli a megújuló energia rendszerekre vonatkozóan	általános képzés, szakmai képzés : a megújuló energetikai rendszerek elméleti alapjainak és gyakorlatának a képzésére	szakismeretek bővülése, a beruházások jövedelmezőségének a javítása, közgazdasági szemlélet megismertetése a megújuló energetikai rendszerek kombinált alkalmazásában
5.2. Képzési célkitűzések iskolakörön kívüli felnőtt oktatás OKJ és OKJ-n kívüli a megújuló energia rendszerekre vonatkozóan	kiemelten ingatlan IT (domotika képzés) a felhő típusú virtuális hálózatban alkalmazható energetikai megoldások (okos mérőórák, távműködtetés) alkalmazásával	az épületek energetikai megtakarítása IT eszközökkel is biztosítható, az IT-nek szerepe van a megújuló energetikai megoldások optimalizált kombinált megoldásában
5.2. Képzési célkitűzések iskolakörön kívüli felnőtt oktatás OKJ és OKJ-n kívüli a megújuló energia rendszerekre vonatkozóan	„zöld bérlet rendszer” oktatása, szemléletváltás eléréséhez szükséges ismeretek oktatása, kezelői és felhasználói ismeretek oktatása	megújuló energetikai rendszerek hatékony működtetésével biztosítható a tervezett költségmegtakarítás
5.2. Képzési célkitűzések iskolakörön kívüli felnőtt oktatás OKJ és OKJ-n kívüli a megújuló energia rendszerekre vonatkozóan	épületek kezelői és felhasználói ismereteinek az oktatása gyakorlati ismeretek, meghibásodások esetén javítási és felújítási tevékenységek, épületadminisztráció oktatása, épülethasznosítás tervezése, ciklusidő tervezés, ingatlan felújítás/szanálás gazdaságossági vizsgálat	épületek tervszerű felhasználásával magasabb megtakarítás érhető el, a ciklusidők tervezésével az építőipari kapacitások optimálisan használhatók ki
5.2. Képzési célkitűzések iskolakörön kívüli felnőtt oktatás OKJ és OKJ-n kívüli a megújuló energia rendszerekre vonatkozóan	zöld városrész, zöld város koncepció oktatása (nem csak az ingatlanokra, hanem minden városi eszközre igaz (pl. elektromos gépjárművek, biogáz termelés és hasznosítás, algahasznosítás, stb.)	városrészek és városok levegője megtisztítható, egészséges város a „fenntartható fejlődés, illetve „ÓKO lábnyom” koncepció alapján

Sustainable Home Private Limited Company

## LETTER OF ENDORSEMENT

### The **BUSH**

#### *BUILD UP Skills Hungary project*

is funded by the European Union within the framework of the Intelligent Energy-Europe program under BUILD UP Skills Initiative call.

This letter is to express the interest of our organization, the Sustainable Home Private Limited Company to support the proposed measures in the Roadmap developed by the BUSH consortium.

The Roadmap provides suitable framework for the continuing or further education and training of on-site / 'blue collar' workers in the field of buildings using energy efficient solutions and renewable energy sources. It also takes into account the expected contribution of the building sector to the national targets for 2020 regarding energy efficiency and renewable energies. Based on a complete analysis of the national situation in the Status Quo Report done by the project consortium the Roadmap covers all relevant target groups.

The Sustainable Home Private Limited Company agrees with the importance of the proposed measures of the Roadmap and will contribute to the best of our ability to support their implementation in the following activities:

content of activities (objective, target group)	possible method of implementation (time and resource need)	expected results
sharing the experiences and suggestions on the qualification of the enterprises	discussions between experts, according to the scheduling of the Action plan of the BUSH Roadmap	evolving the proper qualification systems of the enterprises
sharing the experiences on the sales of the building energy modernization projects	discussions between experts, according to the scheduling of the Action plan of the BUSH Roadmap	the experiences of the market-based sales can be built into the measures about the awareness raising
sharing the experiences of the customers on the tendering system	discussions between experts, according to the scheduling of the Action plan of the BUSH Roadmap	the experiences of the customers (primary target group) can be built into the measures about the tendering system
